AI For India 2.0

Sudipta Dhara

Senior Backend Engineer @ DECA Games | Python 3 & Gen-AI
Specialist | Founder – Talk2Term & ProDevs
Kolkata, West Bengal, India

Summary

I'm a Python-first backend engineer who brings ageing game servers into the present at DECA Games.

Highlights

- Migrated a million-line Python 2 codebase → Python 3 in just a few months on Google App Engine.
- Designed and deployed Redis Enterprise caching; Gatling-tested to 15 000 req/s after learning Scala in a week.
- For most of the last five years I've single-handedly operated and evolved the backend of a renowned mobile game.

Side Projects

- Talk2Term — credits-based CLI + Zsh plugin that converts natural language into safe shell commands (OpenAI-powered).
- ProDevs — blog & newsletter automated with Make.com + LLMs, helping developers stay relevant in the AI era.

Core Stack

Python 3.12 · Django / Flask / FastAPI · Redis · GCP · Docker +
Portainer · Gen-AI APIs (OpenAI, Groq) · Gatling/Scala · ESP-IDF ·
Home Assistant

Open to short-term consulting & freelance work in:

- Legacy Python modernisation & upgrades
- Greenfield Python projects (FastAPI, Django)
- Feature implementation, performance tuning, and infrastructure hardening

Experience

Prodevs
5 months

Creator — ProDevs prodevs.in

June 2025 - Present (5 months)

<https://prodevs.in>

- * Designed a Make.com pipeline automating SEO blog posts, newsletters (ElevenLabs voice), and videos (Creatomate/RanwayML/Json2Video).
- * Publishing AI-crafted content that educates developers on staying relevant in the Gen-AI era.

Founder — Talk2Term talk2term.prodevs.in

June 2025 - Present (5 months)

Kolkata, West Bengal, India

<https://talk2term.prodevs.in>

- * Built CLI & Zsh plugin that converts plain English into secure shell commands via GPT.
- * Deployed a credits-based billing system with automated top-ups.
- * Open-sourced the plugin: <https://github.com/ProDevs-Kol/zsh-talk2term>.

DECA Games

Software Engineer

December 2019 - Present (5 years 11 months)

- * 1 M+ LOC from Python 2 → 3 in a few months with zero player downtime.
- * Introduced Redis Enterprise caching; sustained throughput to 15 k RPS under Gatling load tests.
- * Built a Scala-based Gatling suite in 7 days to simulate launch-day traffic spikes.
- * Maintainer of the game's backend: feature development, refactors, monitoring, incident response.
- * Onboard and coach new engineers; created Slack-based alerting tools for data-validation and ops events.

HIGHBREED DEVELOPMENT INDIA PRIVATE LIMITED

Software Engineer

August 2018 - December 2019 (1 year 5 months)

Pune, Maharashtra, India

Digital Aptech

Senior Software Engineer

August 2016 - August 2018 (2 years 1 month)

Packr

Chief Technical Officer, Co founder

June 2015 - May 2016 (1 year)

Kolkata Area, India

System development.technical operations, tech lead.

Paaltao

Chief Technical Officer, Co founder

February 2015 - May 2016 (1 year 4 months)

Virgin Islands (British)

Idea implementer of my own start-up.

BlueHorse Software

1 year 5 months

iOS Development

August 2014 - January 2015 (6 months)

Team Lead of iOS app development team.

Sencha Development

June 2014 - October 2014 (5 months)

Developed too hybrid app with sencha touch 2

Web Developer

September 2013 - June 2014 (10 months)

Working in Magento, CodeIgniter, Yii.

Soft Amass India

Web Developer

November 2012 - September 2013 (11 months)

Tamluk

Build a service for money marketing company called kiran india, developed a service to manage a pathology, build a service for fl shop management system, Schools payroll system, Online exam system, medical store management system, hospital management system in PHP, MySQL

Education

KiiT University

Master of Computer Applications (MCA), Computer Software Engineering · (2010 - 2013)

Seacom Engineering College

Bachelor of Computer Application (BCA), Computer Software
Engineering · (2007 - 2010)

Byabattarhat Adarsha High School
Higher Secondary, Science · (1999 - 2007)
